Happen ⋺

This little word serves well to show what
I do with ids. I remember well the moment many
years ago when I created the id for "happen" so
matter of coursely. "Hap" means chance, ⋺ (to) I use
for transport + travel — "go by" So ⌢ is "go by (means of)
chance." But I was never happy with this, for as the
great genius Goethe said, "Das Gewebe dieser Welt ist
aus Tucht + Notwendigkeit geworben." The fabric of this
world is woven from Chance + Necessity. (⋺ = must ; adjective ⋺
necessary ⋺ necessity ⌐ noun cap). ⋺ instead of ⌢ for
"happen" , an improvement! "happen" is an improvement! Who is to say that the
necessity aspect of existence is less important than the
chance aspect? By opting for ⋺ for "happen" and rejecting
the etymological aspect of "happen = by chance" I assume
a more scientific + less passive stance. Thus with ids
one can take control of ideas. (Ⓐ control, ideographically
supported + strengthened by combining it with ⎓, road: stay on
the road, on the correct, committed-to path �)
